What Is Event Photography?

Event Photography is fundamentally different from wedding or portrait work. The results of Event Photography are candid, snapshot-style "party pix." All photographs will be taken with natural light and/or a basic camera flash with no retouching or enhancements.

Why hire Madhu Madhavan Photography for Your Event?

There is quite a difference between amateur and professional "snapshots." In addition, I have invested in a powerful, fast-shutter, professional digital camera. A small example is that there is no time delay between pressing the "button" and snapping the photo as most home-quality cameras experience. Free yourself to be the host or hostess and be secure that I will capture all the big and small moments of the day. Rather than relying on guests with varying-quality cameras (who may or may not forward those photos to you), know that you will see every proof of every shot. Choose as many or as few shots as you would like and as many print of those shots as you need.

Booking Fee & Hourly Rate

\$75 nonrefundable booking fee required, which includes one hour of candid photography. \$50 hourly rate charged for all additional time.

Client must pre-arrange the length of the event shoot.

*Minimum of 30 un-retouched proofs, per hour of event, would be available to review online. All proofs will be available for review at <http://madhumadhavan.com>. You may choose any combination of prints you would like. You are not tied to any particular order size or price. You can mix and match only the prints and sizes that match your budget. See the ***Photo Product Sheet*** for pricing.*

If you would like some of your photos retouched and enhanced, my standard fee is \$5 per photo, with a \$100 minimum (20 photos or less). I prefer if you contract in advance for retouching so that I can ensure I have time in my schedule for this process. However, you can also choose photos for special attention after reviewing their online proofs. I can be flexible and work with your needs.
